● reads ■ site blocks ○ provider declines ○ inconclusive

Every morning we load the homepages of Germany's 50 most-visited websites with the same fetch tools ChatGPT, Claude and Gemini use. Blue means the agent read the page. Red appears only after two refusals: a solid dot if the website or its robots.txt blocks the agent, a ring if the AI provider itself declines. Gray means inconclusive, with no block on record. Meta AI has no public fetch tool, so for Meta we show only what robots.txt allows. * Meta AI has no public fetch tool, so we only show its robots.txt.
